About

Designed by Christopher Metcalfe and developed in collaboration with award winning firm Revolution Fibres, the Share Pod features Phonix™ nanofibre as an acoustic substrate designed to enhance the absorptive features of the soft walls. The Share Pod is designed to increase productivity in today's open office spaces. The sixth design in the series, the Share Pod provides a flexible work zone for informal catch-ups, client meetings, brainstorming and easier connection with co-workers. It has the flexibility to be configured to any size of space, to include a desk and chair, add a media screen or other technology and the power and USB charge points come standard. Internally routed cable management facilitates power and data solutions built into the work surface.

Specifications

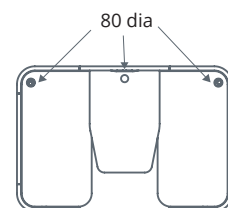

Worktop included: Melteca, 15mm rebate standard, plus scallop cut for cable to pass through.
 Worktop colours: Snowdrift, Seal Grey, Tawa, Teak.
 Includes the exclusive Phonix™ Nano Fibre acoustic substrate.
