

KEYSTONE™

recipe book

A multi-purpose, modular
furniture system for today's
rapidly-changing workplace

www.iqcommercial.co.nz

We've been
cooking up
something
special...

In today's rapidly changing workplace what works as an office layout today may not work tomorrow.

As an investment, office furniture should be flexible, agile and consider the future.

Enter KEYSTONE™

A new modular furniture system
from IQ Commercial.

Building on IQ Commercial's successful
series of acoustic pods, Keystone™ is
another step forward in modular furniture
due to its innovative, reconfigurable design.

As its name suggests, Keystone™ offers
you a central, foundational system which
provides support for the entire office.

Have your cake and eat it too.

Change is a guaranteed part of the modern workplace.

Whether due to team growth, large-scale organisational restructure or changes to accommodate new styles of working, furniture should be flexible, agile and consider the future.

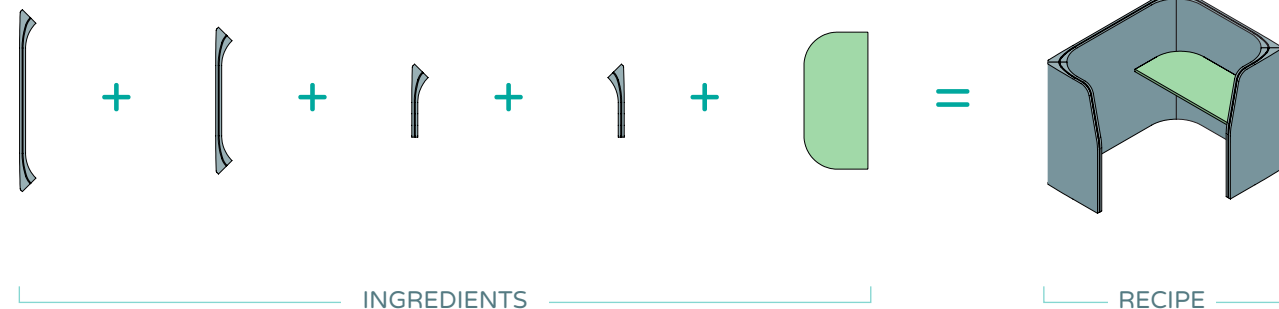

A KIT OF PARTS

Keystone™'s unique modular design provides modern office users superior flexibility and agility. It offers users a "kit of parts" - an inventory of interchangeable components or "ingredients" which can be combined and reconfigured into various "recipes"- adapting to evolving needs with minimal investment.

Customise your furniture by choosing and assembling elements into unique combinations which work for your own staff and floor plan.

À LA CARTE

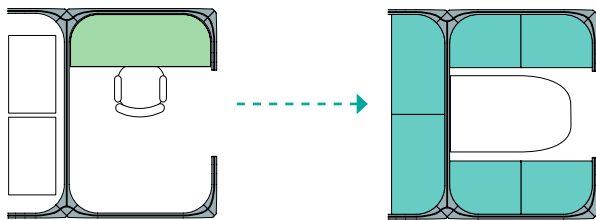

Each piece can be bought, shipped and stored individually depending on the requirements of an office at a particular point in time.

Modular: Interchangeable "ingredients" combine to form custom "recipes."

MULTI-FUNCTIONAL

Traditional office furniture can be limiting. A single item of furniture is used for a single purpose. With Keystone™, however, a focus pod can be reconfigured to be a sofa or a collaborative setting offering a unique, multi-functional user experience.

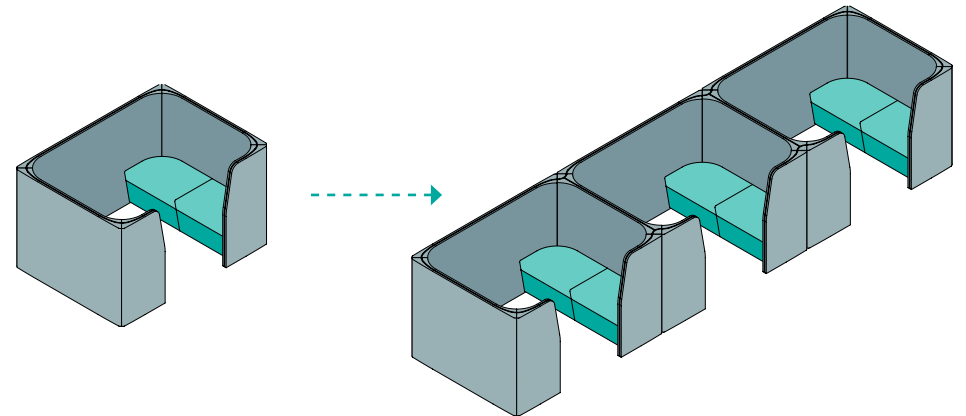

FOCUS POD

MEETING SPACE

Reconfigurable: Add and remove parts to create different solutions according to user requirements.

FUTURE-PROOF

Due to its inherent modular design, Keystone is scalable, allowing users the ability to future proof offices without setting the arrangements in stone. This offers users the ability to scale up and down with shifts in staff or changes to office space or location.

Scalable: Add and remove parts to create different solutions according to user requirements

Hungry for change.

Supporting the latest ways of working.

In our quest to improve productivity and well-being within the modern workplace, IQ Commercial seeks to integrate new technologies into our furniture designs, improve efficiencies and support the latest ways of working.

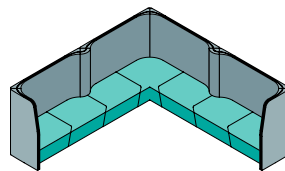

COLLABORATION VS FOCUS

Furniture solutions should enable workers to be more productive within their working environment - which means striking a balance between promoting collaboration and allowing essential quiet spaces.

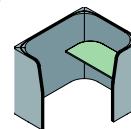

Keystone allows for a variety of layouts to be assembled from the same ingredients - covering all the bases.

Focus pods create areas to be used by staff who want quiet spaces. Collaborative meeting spaces with soft seating allows for spontaneous catchups in ways that do not disrupt those involved in concentrated work. Connected pods in rows creates alternative desk space for more mobile users or temporary team members.

The system has been detailed to allow for the full integration of power/data, cable management and technology, ensuring seamless user experiences and supporting workplace productivity and flexibility.

COLLABORATION

FOCUS

Balance of focus vs collaborative space

This really takes the cake

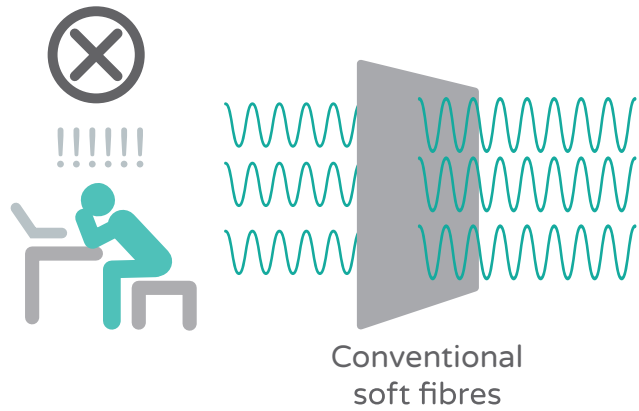

A quiet spot to work is now one of the most sought-after features in an open plan office.

Stress, fatigue and loss of cognitive ability due to noise and distraction is on the rise. Investing in high-quality, soft furnishings helps mitigate the impact of noise and collaborative efforts.

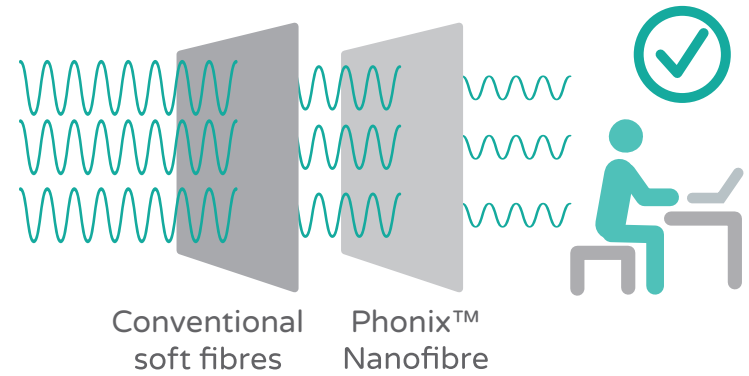

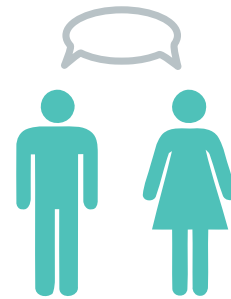

NOISE AND ACOUSTICS

IQ Commercial's soft furniture has been specifically designed using thousands of layers of Phonix™ nanofibre in a proprietary composite. The microscopic fibres create an incredibly thin, dense web which drastically improves sound absorption levels across a broad range of frequencies.

This world-leading application of nanofibre (with proven noise reduction properties) results in superior, measurable acoustic performance and creates opportunities for new ways of working.

CONVENTIONAL
SOFT FURNISHINGS

KEYSTONE

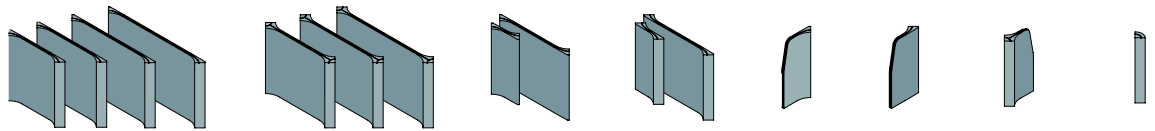

Everything but the kitchen sink.

EASY AS PIE

Here's how it works. Keystone offers you a choice of "ingredients" which fit together to create "recipes". The shared wall system reduces the number of parts required and recipes are reconfigurable depending on your needs.

TABLE FOR ONE

TABLE FOR ONE

Table for One is a destination touch-down point which offers privacy for individual focused work. Suitable for mobile team members who need a spot to work but don't require a dedicated desk.

The soft, upholstered walls absorb noise common in today's open-plan office and provide shelter from both visual and acoustic distractions.

The inclusion of world-leading, exclusive nanofibre technology

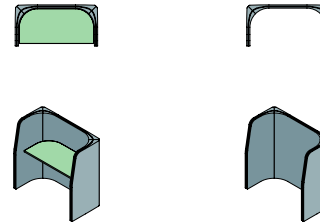

in the upholstery results in superior acoustic performance.

Internally-routed cable management facilitates power and data solutions built into the work surface.

Can be placed as a stand-alone unit or combined together to create groups of 2 or 4 pods.

The pod can be adjusted to a left- or right-handed opening.

PRIVATE DINER

FOR TWO

PRIVATE DINER FOR TWO

Private Diner for Two provides a private collaborative work space for two within the open office. Comfortable seating and upholstered walls create an inviting space for private meetings or as a quiet retreat for an individual.

The free-standing unit can be placed anywhere in the office and can move and suits clients who require flexibility in their floorplate.

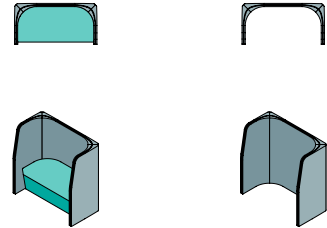

The soft, upholstered walls which incorporate exclusive

nanofibre technology, help mitigate the impact of noise and collaborative efforts. This means both those inside and outside the pod can work more productively, free of distraction.

Add a table or a computer monitor to create a perfect spot for multi-media presentations or video-conferencing.

Internally-routed cable management facilitates power and data solutions built into the work surface.

The Icing on the Cake

Sustainable, Kiwi design and manufacturing saves you money in the long run.

Designed and manufactured in New Zealand, Keystone™ is made with quality materials built to be durable and withstand frequent reconfiguration and storage.

\$ Cost Savings: Keystone™'s flexible and reconfigurable design, and shared wall system, helps combat ongoing spending and quality issues - saving your organisation money in the long run.

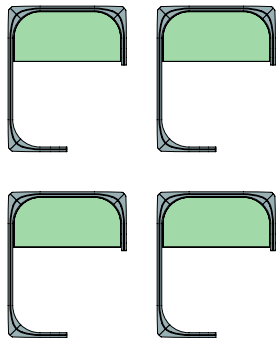

🌿 Sustainable: Constructed from lightweight, eco-friendly material Keystone™'s individual "ingredients" can be shipped more easily and economically.

↻ Flexibility & Future Proofing: Keystone™ is scalable and flexible, offering users the ability to scale up and down with shifts in staff or changes to office space or location.

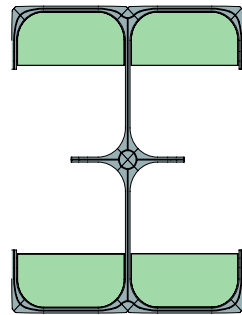

📣 Acoustics: Keystone™ uses world-leading application of nanofibre as a substrate, which allows workers to work in close proximity to each other with minimal disruption due to noise

💬 Collaborative: Keystone™ layouts encourage quick, easy collaborations and allow for spontaneous meetings to be held in ways that do not disrupt those involved in concentrated work.

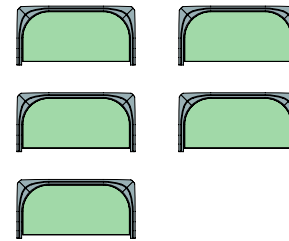

★ Aesthetics: Keystone™ is comfortable, inviting and nurturing of both deep thought and fun, social interactions.
